

Good scientific practice awareness form

ESMP group

I, _____, confirm that I have read and understood the following two documents on good scientific practice and research ethics:

1. The Singapore Statement on Research Integrity
2. The European Code of Conduct for Research Integrity
3. FNR Research Integrity Guidelines: A guide to good and ethical conduct of research within the framework of the FNR funding schemes

I also confirm that I agree with the content in these documents and will abide by the rules spelled out in them, and that I will follow the ESMP group's guidelines for proper data storage (as detailed on our internal website area), while I am in the group as well as when I am about to leave it, ensuring access to primary data for all disseminated results well after I left the group.

In the vast majority of cases, a breach of good scientific practice happens not because of ill will but because of forgetfulness, hence we must all work together to make sure that good scientific practice is always maintained. In this spirit, if ever I notice that work in the ESMP group does not follow good scientific practice, I will politely point out the problem and help to find a solution before proceeding.
